Just Spas

Just Spas is devoted to improving the lifestyles and wellness of Australians by providing swim spas that offer superior hydrotherapy and exercise systems. When you purchase from Just Spas, you're getting the full support of our nationwide network of independent dealers that offer the highest levels of customer service for the lifetime of your spa.

Our Australian made spas are manufactured in Victoria in the largest spa manufacturing facility in the southern hemisphere. Our state of the art manufacturing plant has won numerous awards and recommendations for its products, earning a reputation for quality, innovation and craftsmanship through more than 25 years in business.

We offer the highest quality Australian made spas that lead the way in technology, reliability and energy efficiency. Our mission is to offer the best spas and swim spas, with dealer networks throughout Australia and New Zealand.

All our spas are approved to Australian Standards and we offer the most comprehensive warranty program that will give you the ultimate peace of mind.

Swim Spas

Have the best of both worlds, offering you both fitness and relaxation in your backyard. Swim spas are a great option if you want more room than a traditional spa.

Allowing you to swim against the swim jets, swim spas offer you a whole body work out while reducing stress on the body and muscles. Swim spas are often a more cost effective solution to traditional pools and have more added value with both relaxation and fitness benefits.

AQUAZONE

TRANQUILITY AND FITNESS IN ONE

Bring home exquisite luxury with the AquaZone Series. With seating for 5 including a spacious swim area, the AquaZone® is a complete fitness centre and a perfect addition to any outdoor living area.

Designed with dual temperature controls that maximise your hydrotherapy needs along with the ability to program the swim station jets to your desired choice, your fitness centre will always be ready when you are.

HEATING UPGRADE OPTIONS

Swim all year round by upgrading the heating unit on your Swim Spa with two energy efficient options.

HYBRID ELECTRIC HEAT PUMP

Using a heat pump will reduce the heating running costs by approximately 30% to 40% and is compatible and easily controlled from your touchpad with the necessary equipment or with the iSpa® Wifi App.

Heat Pumps perform best when ambient temperatures are over 18C°. The Hybrid Electric Heat Pump can be fitted to all Swim Spa models in our range.

HYBRID GAS HEATER

The Hybrid Gas Heater is by far the most effective and efficient way to heat your spa. The Hybrid Gas system has fast heat-up times (temperature rise by 24C° to 55C° per hour per 1000 litres of water) and is easily controlled from your touchpad with the necessary equipment. The Hybrid System reduces chemical usage and also reduces the running cost of your spa by up to 70% and is compatible with iSpa® Wifi App.

The Hybrid Gas Heat Heater can be fitted to all Swim Spa models in our range.

ARCTIC INSULATION

Standard on all Swim Spas, Arctic Insulation locks in any potential heat loss and reduces heating running costs by up to 30%.
